- **Automatic Updates:** Receive the latest features and improvements, hands-free
- **Data Security:** Automatic backups, ransomware attack protection
- **Ideal for All Schools:** Designed for schools with limited IT resources, and larger districts
- **Full Featured:** Experience all renowned Telecenter U features and capabilities

Keeping Classrooms Connected

Powerful tools for emergency response and daily workflows

Say hello to the future of school communication and empower your district with the very best features. From the district office to each and every classroom, educational facilities benefit from Rauland's Telecenter U school communications system for emergencies, event management and everyday communications.

Powerful Tools for Daily Operations

Telecenter U is a market leading network-based school communications system that provides a seamless solution for every school and every classroom in a school district, including:

- IP addressable speakers
- POE message boards
- Touch screen kiosks
- Web-based user interface
- Mobile application

Instant Information At-A-Glance

District and School mapping allows administrators to instantly view the current status of an entire school district, or individual schools and classrooms, on an interactive graphic map. See indicators instantly for intercom and paging calls, classroom cleaning status, flagged IT issues, emergency situations and more. During emergencies, administrators can quickly view areas marked safe and spot those affected for a quick and appropriate response.

Audio Control in Classrooms and Offices

Telecenter U uses "widgets" for various tasks, including control of audio settings and playing music in the classroom. Teachers and staff can temporarily mute and control audio to silence bell schedules or use two-way audio between Rauland administrative consoles and staff for fast and easy communication.

Efficient Emergency Response

Telecenter U is a multifaceted notification solution and the fastest, most robust way to communicate unified emergency instructions across an entire campus with powerful tools for automated emergency response. The system focuses on immediate in-building emergency communications – both audible and visual – integrating your day-to-day communication platform with your emergency notification system so that everyone is familiar with it and knows how to respond.

Improved Workflow Management

Authorized personnel and school staff can request assistance directly with IT, custodians, school nurses or other personnel, kicking off workflows immediately. Custom call buttons can be configured for the unique needs of every school.

Communication Innovation Leader

Integrating your universe with hands-on and hands-free solutions

One Critical Communications Solution

Telecenter U uses your district's data network to connect all of your facilities together. The IP-based, critical communications solution leverages your investment in existing network and cabling infrastructure and legacy equipment by integrating with public address, clock synchronization, security and access control systems – providing a complete solution, customizable to fit all communications needs in your district.

The Leader in School Communication

For more than 80 years, Rauland has been dedicated to the communication needs of schools just like yours – which is why you will find our communication solutions in more schools than any other brand. Our products are backed by a five-year manufacturer's warranty – our guarantee to you of system quality, performance and reliability that Rauland customers have come to expect. Service, installation and support is delivered 24x7 through our network of certified distributors, with support from a team of on-staff Rauland engineers.

Connect Your Universe®

Telecenter U® Cloud makes it easier for schools to operate in today's challenging environment to help keep school districts, schools and classrooms safe and healthy. The advanced communications system from Rauland offers:

- 1 Custom Call Buttons for your unique needs
- 2 Emergency Sequences to your crisis plan
- 3 Tools for Everyday Communications and Bell Scheduling
